

# Blake Yeboah

FULL STACK SOFTWARE DEVELOPER

## Profile

I am a **full stack software developer** who loves to build applications from static websites to social networks. I utilize a variety of languages and frameworks to build effective web solutions for business's and their clients. My preferred tech stack is the **MERN stack**. I love learning and am always open to learning new technologies to get the job done.

## Projects

### DevNetwork

A full stack web application with authentication, post functionality, messaging functionality and more built on the MERN stack. In other words, this web app is a social network for developers to share their projects and socialize with other developers.

[Code](#) - [Preview](#)

### Career Busters

A responsive website for a future business called career busters that has a great user experience (UX) designed to engage users. It has animations, clean transitions and a great UI that emphasizes the branding of the business.

## Education

### Self Taught

OCTOBER 2018 — PRESENT

I taught myself web development through online resources like Udemy and YouTube as well as browsing documentation .

## Experience

### Work Experience, Digital8

SEPTEMBER 2020 — SEPTEMBER 2020

During my 1 week work experience at Digital8, i learned a lot from developers in a professional environment that has helped me improve as a developer and expand my knowledge base.

### Developing Web Applications, Personal

JANUARY 2018 — PRESENT

I've been programming personal web applications since 2018 and have progressed significantly as a developer.
